RPA Developer

The RPA Developer leverages intelligent automation technologies and various toolsets to develop complex robotic process automation (RPA) solutions to existing business processes. The successful candidate is responsible for ensuring designed automations are providing the required results through testing, monitoring, technical support, and continued process optimization.

Roles & Responsibilities:

- Design and configure new RPA processes and objects in the RPA tool by adopting design principles that drive high reusability, maintainability, and scalability.
- Support existing production automations and implementation of automation revisions
- Ensures timely, effective, and quality delivery of bots with minimum discovered defects
- Collaborative work with team members to ensure all work is properly tested, secure, and functional
- Collaborative work with team members to diagnose, identify, and remediate issues and defects
- Must have great attention to detail, and be committed to delivering quality results
- Assist in the analysis and documentation of requirements, testing, and other design artifacts
- Assist with the maintenance of documentation in the context of a change management process
- Must be able to multitask and willing to work on multiple projects at a given time

Experience and Qualifications

- Hands-on experience with Automation Anywhere A360
- Excellent understanding of RPA
- Hands-on experience on RPA projects
- Basic understanding of scripting languages

RPA Developer

- Good understanding of process automation lifecycle.
- Familiar with Attended and Unattended bots.
- Ability to work to deadlines and manage expectations.
- Strong analytical skills to solve implementation issues and move forward with RPA bot creation
- Willingness and Capability to learn new technologies quickly

Light Python and/or Selenium experience a plus
